### WORK EXPERIENCE

2015 - present

#### HTH ARCHITECTS - Los Angeles, CA | DESIGNER

##### Design | Project Management | Drawing Development

In my time with HTH I have been able to successfully carry out most aspects of an architectural project. Our projects vary vastly in size and use, from large-scale retail shopping centers to small scale restaurants, in which I have been involved from schematic design to construction drawing development. As part of my duties, I have been able to coordinate with clients and consultants in order to successfully meet our project goals and deadlines. In this process, I have been exposed to several big-time development companies like Vestar and Irvine Company, to which I am the point person in several projects. Moreover, I have been able to take several projects through the permit process and work with different government agencies.

march 2014 - dec. 2014

#### RYDER DESIGN & ARCHITECTURE - Santa Monica, CA | INTERN DESIGNER

##### Design Experience | Drawing Development | Model Crafting

In my time with Ryder Design, I was able to receive valuable experience and knowledge of the workings of an architectural firm. Mostly dealing with Residential projects, I was entrusted with three dimensional concept design articulation, design drawings, and construction drawing development. Part of my tasks also included crafting hand-made wood models for many of our built and in-design projects.

jan. 2013 - august 2013

#### SFA DESIGN - West Hollywood, CA | INTERN DESIGNER

##### Design Experience | Drawing Development

In my time with SFA Design, I was able to sharpen my computer drawing, drafting, and sketching skills to help turn design ideas into well articulated design and construction documents. I constantly collaborated with the designers in creating a rich interior designed experience and comfortable/adequate/perfect space programming in both residential and hospitality projects.
